

7 MILE ROAD PARK MASTER PLAN

HELP US TO DESIGN THE FUTURE

www.twp.northville.mi.us

We're moving forward with a community-driven, environmentally responsible redevelopment plan that will create a community asset for decades to come.

Twenty21 is Northville Township's initiative to create a dynamic vision for future development of the former Northville State Regional Psychiatric Hospital property.

FIRST, THE MASTER PLAN

The master plan program, now underway, includes significant community input and participation from which design concepts and a master plan will result. While the property will ultimately be developed for recreation, engaging the public as well as other stakeholders throughout the process will help us determine the most suitable uses for the land.

The Township has hired a team from Stantec Consulting to lead the public engagement and master planning process. Their work is being overseen by Township staff and the Twenty21 Green Ribbon Committee of local volunteers.

WHAT'S ON YOUR MIND?

Two surveys have been developed to gather community input related to the future redevelopment of the 7 Mile Road Property. Please take a moment to respond. The surveys are posted on the Township website and are available at the Township Hall.

PLAN TO ATTEND: COMMUNITY DESIGN WORKSHOP

The Community Design Workshop will be held on **June 9, 2011 from 8:30 AM – 7:00 PM at Township Hall**. This interactive exercise, will involve participants in a series of activities to create and explore various design concepts. Also known as a "charrette" or intensive brainstorming and visioning session, participants are invited to share their thoughts, review what other communities have done with similar sites, and help develop a vision for the property. From this information, designers will then develop three conceptual design plans, which will ultimately lead to the final design. Additional workshop information will be posted on the website prior to the event.
