

- 1.) Is unit pricing required? If so, how is it to be broken down  
**Unit pricing is preferred but not required. Unit pricing will allow for better comparison between each bid. The breakdown per camera location, NVR and NVMS, and then labor would be ideal.**
- 2.) There are three PDF documents showing only cabling. The RFP states all cabling to be existing and installed prior to our arrive. Please cabling is to be existing and is not needed.  
**Cable is on a separate RFP but is utilizing the same plan set. Cable will be run to each of the designated camera locations prior to installation of the cameras and no cabling is expected to be included in the CCTV RFP.**
- 3.) Will the City be providing patch cables at both ends?  
**No, Patch cables in the server room will be provided by the Township but the CCTV RFP Bidder is expected to provide and mounting brackets, patch cables, or other equipment required to connect the cameras to the end of the cable run at each camera location.**
- 4.) Is this RFP subject to prevailing wage rates?  
**No**
- 5.) Is mounting hardware required for exterior single lens cameras or will they be surface mounted to the buildings.  
**It will be the contractor's responsibility to provide the appropriate wall mounts and any necessary adaptors to provide a clean installation for all exterior cameras.**
